Message from Keri S. Harris, M.D. Health Commissioner

Vaccine preventable diseases, vaccine funding, and Ebola response were just a few of the notable challenges for public health in 2014. Though these issues had limited impact on the citizens of our county, they provide a stark reminder that both new and reemerging infectious diseases can threaten us, and the resources required to address them.

The United States, and the public health system, has encouraged vaccination as a means of preventing or even eradicating diseases like polio, measles and mumps. Although not all vaccine preventable diseases are life threatening, the protection from disease provided by a vaccinated population is critical to our overall health, particularly for those not able to be vaccinated due to serious health conditions. Consequently, the growing trend of healthy individuals refusing to vaccinate increases the likelihood of more outbreaks of preventable diseases, like the measles outbreaks in Ohio last year, and the likelihood of those with serious health conditions being negatively impacted. For this reason it is essential that the Health District continues to aggressively promote our vaccination efforts.

The affordability of vaccination is essential in reducing barriers for families to become vaccinated. Historically, the Ohio Department of Health has subsidized a majority of these vaccines which permitted Health Departments to vaccinate the public at little or no cost. With the change in healthcare law, and the requirements that everyone has insurance, the State is now phasing out a majority of the vaccine subsidies Health Departments have relied on. This, coupled with the high deductibles for many health insurance programs, will potentially increase the out of pocket expense for routine vaccinations. Even with the forecasted increase in vaccine costs, the Health District is committed to continue to make vaccinations affordable to every citizen of Wyandot County.

For years we've heard information about Ebola in the news, with little thought that we could really ever be affected by such a devastating disease. However, Ohio was quickly reminded that with today's international travel, we are only a few flights away from any disease. The experience with potential Ebola exposures in Ohio has made us revisit tough public health practices, such as, the quarantine of exposed healthy individuals for extended periods of time, and the monitoring of individuals that have traveled to Ebola affected areas of the world, in order to protect us locally. The Health Department and our healthcare partners are committed to continue our preparedness and educational efforts to protect our citizens from rare public health threats.

As Health Commissioner and Medical Director for the Wyandot County Health District, I want to thank the Community for their support as we continue to provide health and safety services to the citizens of Wyandot County.

Mission Statement

The Wyandot County General Health District is dedicated to providing health and safety services that positively impact the well-being of all citizens of Wyandot County.

2014 Public Health Nursing

Grant Funded Programs

Child & Family Health Services

Child & Family Health Services (CFHS) grant focuses on elimination of health disparities, improving birth outcomes and improving the health status of women, infants and children. This grant provides funding to continue through the Community Health Improvement Cycle following the 2012 Community Health Assessment and initiate planning for the 2015 Health Assessment. In our efforts to reduce childhood obesity, evidenced based Nutrition education programs were implemented in 14 different preschool classrooms and 26 different 2nd grade classrooms. To reduce the rate of infant mortality, nurses provided Safe Sleep messages and educational materials to medical providers and other community partners.

Immunization Action Plan

IAP grant focuses on increasing infant immunization up to date rates for children up to 24 months of age. The goal is to achieve and maintain 90% vaccination coverage level for recommended vaccines through: Periodic assessment of WCHD up to date rate; Identifying disparities in our county and provide additional education to parents; Educating health care providers regarding the importance of timely immunizations; Providing vaccine access to WIC clients at the time of their WIC visit; and Providing reminder/recall to those who are due for immunization visits. Our December 'Up to Date' rate was 85%.

Life Skills Program

Life Skills is an evidenced based Tobacco Prevention Program implemented by trained PHN's in grades 3, 4, 5 at East, South, Union, St. Pete, OLC and Mohawk. The program was expanded to Union 6th graders during the 2013-14 school year. Students are educated on tobacco, alcohol, street drugs and skills to promote self-esteem, stress reduction and skills to stand up to peer pressure. Funding is provided through the Mental Health and Recovery Services board of Seneca, Sandusky and Wyandot Counties.

Reproductive Health & Wellness Program

The Family Planning Clinic is funded through RHWP grant. Program goals include improving the overall health and well-being of women and men by promoting healthy lifestyles and encouraging the establishment of a reproductive life plan. Confidential services are provided to persons 13 years and older. Fees are based on family size and income. Priority is given to persons with low incomes and those with no insurance or insurance that does not cover reproductive health services. During 2014, 56% of our clients were under 100% Federal Poverty Level; 28% received services as NO PAY; 35% Private Pay; and 21% Medicaid. Through additional grant funds received this year, we successfully transitioned to electronic medical records for this clinic.

Wyandot County Breast Health Initiative

WCBHI is a grant through Susan G. Komen of Northwest Ohio. Through collaboration with Wyandot Memorial Hospital, this program provides access to free mammograms and/or breast ultrasounds for women and men 19-64 years of age who are uninsured, underinsured with incomes below 300% of the Federal Poverty level. Funding also provides gas vouchers to income eligible residents with Breast Cancer who travel out of county for chemotherapy and/or radiation treatments.

Immunization Program

Vaccines reduce and eliminate disease in children, adolescents and adults. Our goal is to provide access to the public for affordable vaccines, minimizing out of pocket expense and vaccine refusal. We are currently contracted with 4 private insurance companies and numerous Medicaid programs. The immunization staff remains current with vaccine changes following ACIP guidelines to provide reliable and accurate vaccine education to the public and medical community. All immunizations administered are entered into the State Immunization Registry, Impact SIIS. Appointment only clinics are held Mondays: 12-6 pm and Fridays 9-11:30 am and 1-4 pm at the Health Department and at the Carey Sr. Depot the 2nd Monday of each month 2-6 pm.

Communicable Disease Reporting

Public Health Nurses conduct surveillance and investigation for infectious diseases as mandated by the Ohio Administrative Code 3701-3. The top three reported infectious diseases in Wyandot County during 2014 were: Chlamydia, Hepatitis C and Influenza Hospitalizations.

Bureau for Children with Medical Handicaps

BCMh is a public health nursing program funded through Ohio Department of Health, linking families of children, up to 21 years of age, with special healthcare needs to a network of quality providers and helps families obtain payment for the services their child needs. BCMh promotes early identification of children with handicapping conditions and treatment of those children by appropriate healthcare providers. Three PHN's provide services to children who meet eligibility requirements.

Medicaid Administrative Claiming Program

MAC provides reimbursement for administrative activities to improve access to the Medicaid Program, improve the use of Medicaid Services by those who are Medicaid eligible and improve the overall delivery of Medicaid services to residents in Wyandot County. During 2014, reimbursement was \$16,358 for work in this program.

School Nursing

School Nurses promote student health and success in pre-school through high school and beyond. Current school nursing contracts include Angeline, Carey, Our Lady of Consolation, St. Peter's and Upper Sandusky Schools. We also contract with Mohawk schools to provide required hearing screenings and referrals. School nurses are an integral part of health promotion within the school community, providing guidance to school administration and staff regarding a variety of health issues. Daily services are provided to students with special health care needs. In-services for staff are conducted annually to educate on Bloodborne Pathogens, review of Exposure control Plan and Medication Administration Training. Our school nurse for Angeline directs the Delegated Nursing for Angeline students and clients as well as medication evaluations in group home settings. School Nurses monitor students' immunization status and complete the annual mandatory state immunization report. Screening programs include hearing, vision and scoliosis. In-class presentations include discussion regarding hygiene, growth and development, dental health and puberty in select grade levels.

Help Me Grow Home Visiting

WCHD is the Contract Manager for Help Me Grow Home Visiting program. This program provides expectant or new parents with the information, support and encouragement they need through a voluntary, high-quality home visiting service. Home Visiting aims to educate at-risk parents with the resources to understand and capitalize on the optimal early years of a child's life. Four primary goals include: Increase healthy pregnancies; Improve parenting confidence and competence; Increase family connectedness to community and social supports; Improve child health, development and readiness. During 2014, one Public Health Nurse completed all required training certification and began collaboration with current HMG HV staff to expand programming throughout Wyandot County.

Newborn Home Visiting

This new program provides a newborn home visit by a Public Health Nurse to increase parent's knowledge about caring for an infant, promote healthy family behaviors, providing education on topics such as: Vaccines, Safe Sleep, Car Seats, Home Safety and Nutrition. Focus is on first time moms; residents with household incomes under 200% FPL; teen moms and any family or baby identified with medical, social or mental health concern.

2014 Environmental Report

Environmental Health Division

The Environmental Division is responsible for the licensing and inspection of food service and retail food establishments, home sewage treatment systems, private water systems, campgrounds, public pools, tattoo and body piercing operations and solid waste facilities. The Department

also inspects manufactured home parks and schools, and investigates animal bites, nuisances, and smoke-free workplace complaints. In addition we conduct emergency planning, coordinate safe communities grant activities, and conduct animal and vector borne disease testing and surveillance. Some of the significant highlights from 2014 are listed below.

Sewage Program

Last year the Ohio Department of Health adopted new Household Sewage Treatment System regulations which became effective January 1st 2015. The regulations require more stringent household sewage treatment system siting and

design standards, mandate ongoing maintenance and operational permits for all new and existing systems, and impose yearly continuing education for all service providers, haulers and installers. Health District Staff will be working closely with property owners and local contractors to implement the new standards in 2015.

Safe Communities Grant Program

The Safe Communities program aims to reduce motor vehicle injuries and fatalities through education. Local activities are conducted in conjunction with local law enforcement and community partners, and include National Campaigns such as; "Drive Sober or Get Pulled Over," "Click it or Ticket," and "Stay Alive Don't TXT & Drive." Free traffic safety educational materials are available through the grant by contacting the health department.

Food Service Program

Health District staff has worked to implement a new computer management system for the local Food Service/Food Establishment program. The new system was purchased by the Ohio Department of Health and allows for electronic reports to be created

during inspections. Once completed, the forms can be downloaded to the internet, and ultimately available to the public. It is our goal to have the inspection reports available via the internet by the end of 2015.

Vector Borne Disease Surveillance Program

The Health Department resumed its West Nile Virus (WNV) mosquito trapping efforts in 2014. The trapping and testing of mosquitoes is a useful tool which permits health officials to identify an increase in WNV disease in both birds and mosquitoes. When an increase is identified, the public is informed that added personal protective measures are recommended.

Radon Program Update

Free radon test kits were again made available to citizens of Wyandot County. Test kits are obtained at no cost through a grant from the Ohio Department of Health. Radon is the second leading cause of lung cancer; consequently, testing of homes is critical, and the only way to know if a building has significant concentrations of radon gas. Test kits can be ordered by calling the Health Department or through our website.

Emergency Response

The Health District continues to work with our local emergency partners to prepare for, and respond to, emergency situations. Last year, as part of our planning efforts, the Health Department was fortunate to acquire a new portable

emergency generator for use in shelters in the County. The purchase was made due to the identified need for power in rural areas of the county. It is our hope that by providing this county resource, we are able to help assure access to basic needs, such as water and heat, during disasters.

Environmental Health Outreach Activities

Throughout the year the Environmental Health Division worked hard to provide public health information to the community. These activities included publishing health and safety related articles in local newspapers, and regularly updating public health messages on our website and Facebook page. As always, the Environmental Health Division is ready and willing to provide local groups, and the general public, with presentations on environmental health topics.

Wyandot County WIC Program 2014

WIC is the Special Supplemental Nutrition Program for Women, Infants, and Children. WIC works by providing nutrition education as a means of preventative healthcare, referrals to coordinating agencies and nutritious foods to pregnant and breastfeeding women, post-partum women, infants and children up to age 5 years. In 2014 an average of 437 Wyandot County residents were receiving WIC benefits each month.

Breastfeeding is encouraged as the normal and healthiest way to feed an infant. A certified lactation consultant and a breastfeeding peer helper are available on staff to assist with any questions or concerns pregnant or breastfeeding mothers may have. The Wyandot County WIC Program hosts a breastfeeding mothers sharing group the first Tuesday of every month at 11:00 am.

WIC is funded through a grant from the United States Department of Agriculture. Approximately \$305,396 federal tax dollars were returned to Wyandot County in the form of food dollars and grant funds to assist WIC participants during 2014. Participants redeemed \$178,340 worth of WIC coupons at Wyandot County grocery stores in 2014. This is a 22% decrease from 2013. In 2014, Frederick Brothers IGA in Carey decided not to continue as a WIC vendor for the county. The loss of a vendor, along with decreasing caseload statewide is a contributing factor in the decrease in revenue for 2014. Foods eligible for the WIC program include low fat milk, eggs, breakfast cereal, canned or dried beans, peanut butter, fresh, frozen or canned fruits and vegetables, whole grain breads, tortillas, brown rice or oatmeal and infant formula (when indicated). Infants over six months of age are also eligible for Beech Nut baby food in 4 ounce jars. According to the Center for Disease Control, "1 in 8 low income pre-school children are overweight or obese before age 5." This statistic has improved slightly over the past years due in part to the availability of WIC foods combined with nutrition education.

WIC staff distributed 68 sets of Farmers' Market Nutrition Program coupons worth \$15.00 per set. WIC once again partnered with a local Farmer's Market vendor to offer bagged produce at the WIC office. This service, while easy and convenient for the client, did not foster a high redemption rate of Farmer's Market coupons

this year. Dwindling redemption rates and a lack of interest from local market vendors led to the decision to cease participation in the Farmer's Market program for 2015. A container garden project was continued at the WIC office to highlight the benefits of growing vegetables and greens. Recipes and tasting opportunities were available all summer and fall using the fresh produce from the garden and market.

The Wyandot County WIC staff works closely with many partnering agencies to insure that WIC participants are receiving the services they need to promote healthy lifestyles for their families. We refer participants to a variety of agencies and services in the county. WIC tests eligible participants for lead during their scheduled appointments. Public health staff nurses are available during most WIC clinic hours to insure that participants are up to date with immunizations.

WIC Services are available Tuesday, Wednesday, and Thursday at the Wyandot County Health Department. Evening and lunch hours are available by appointment. Upper income limits for the WIC Program are generous and increase with family size. Potential participants qualifying for Medicaid qualify for WIC. Funding is provided to serve all eligible participants. WIC serves traditional as well as non-traditional families. Translators are available for Spanish speaking participants.

If you have any questions about WIC please call Director, Melissa Bianchi, RN, CLC at 419-294-3341.

| Certified Deaths Issued 732 | |

NOTE: The birth and death numbers do not include the occurrences of Wyandot County residents taking place outside Wyandot County.

The Vital Statistics Department of Wyandot County Health Department records all births and deaths occurring in Wyandot County and forwards this information to the Bureau of Vital Statistics in Columbus, Ohio.

Certified copies are issued at \$25.00 each, of which \$3.00 is submitted to the State of Ohio for the "Prevention of Child Abuse/Child Neglect" program and \$1.50 is submitted to the State of Ohio for the "Family Violence Prevention" program. Also, \$5.00 of each certificate will be used solely toward the modernization and automation of the system of vital records in Ohio.

Wyandot County Home Health Agency

Serving Wyandot County Residents since 1966

Wyandot County Home Health has provided Nursing, Therapies, and Home Health Aide services to Wyandot County residents since 1966. Located in Wyandot County, we are quality homecare in the palm of your hands. The staff continually strives to keep up-to-date on new technologies and to provide the best in home health care. We look forward to continuing to provide excellent care, as we are “Neighbors helping Neighbors.”
